DETAILED ACTION

Specification

The abstract of the disclosure is objected to because the current Abstract is not descriptive of the claimed invention in that the claimed invention is directed to a method of treating neoplastic disease and includes copper orotate or copper gluconate, sodium salicylate, Vitamin C and manganese gluconate or manganese orotate and optionally one or more of iron gluconate or iron orotate, sublimed sulphur and zinc gluconate or zinc orotate as the sole pharmaceutically active ingredients, whereas the original abstract is only directed to a composition which is can include other pharmaceutically active ingredients, does not mention orotate or gluconate salts, manganese or sodium salicylate. Correction is required. See MPEP § 608.01(b).

The title of the invention is not descriptive in that “pharmaceutical compositions and their use” so broad as to be meaningless with respect to the claimed invention as indicated above. A new title is required that is clearly indicative of the invention to which the claims are directed.
